GLASER 150

Multicolour garden laser

The garden lasers belong to a new generation of light effects studied to replace the traditional Christmas lights or those used in the outdoor parties, typical of summer season.

This fixture is waterproof (IP 65) and it is equipped with a stake to stick it into your garden and project light on your house facade, but also with a stand to place it everywhere or hang it on a wall. At the switching on, hundreds of wide range laser beams will be produced, to create a unique and spectacular effect. The high quality green and red laser diodes guarantee high performance.

In the packaging you will find the practical remote control with timer allowing to choose the laser colour, the motion speed and the flash frequency, as well as to select operation time, which will avoid useless energy consumption and extend the lasers' life. The timer can be set on 2,4 or 6 hours of operation.

The included cable has a length of 3 m and ends with a small waterproof adaptor.

Color	red + green
Display	No
Laser's animations	150 mW
Mounting bracket	Yes
Laser angle range	140°
Operating mode	Automatic
Red laser power	100mW
Green laser power	50 mW
Remote control	Included
Pc connection	No
Kind of fixture	laser
PC interface	None
Laser Class	Class 3B
Color	black
Weight	0,9
Product dimensions	100 x 100 x 125 mm
Power supply	110V - 220V
Notes	Waterproof (IP65)
