Sing your favourite songs thanks to this amplified speaker including both a MP3 player and a bluetooth receiver. It plays tracks from USB sticks or micro SD cards, as well as from tablets or smartphones (via bluetooth 5.0). This device is endowed with the new TWS function allowing to play music from smartphones on two speakers at the same time via bluetooth.

It is supplied with remote control to operate from a distance and wired microphone to be immediately ready for use. It comes with a built-in battery, which can be recharged through the USB cable (included). The display shows information on the song that is being reproduced. An AUX socket allows to connect further external devices (3,5 mm cable included).

It can be placed on tripod stands thanks to the specific mount hole on the bottom.

Note: it is possible to disable the echo effect, by downloading the file "firmware no ECO" available in the "documents" section in this page.

Material	Plastic (ABS)
Frequency response	20Hz- 18KHz
RMS power	12W
SD player	Yes, included
REC function	No
Max power	100 W
Bluetooth	Ver. 5.0
