## DFS 6

Digital Feedback Suppressor - 6 mic processor

Useful in conference systems, churches or meeting halls, this fixture includes a sophisticated DSP processor and is capable of removing disturbing echo effect and audio feedback, which often take place when microphones are close to the speakers. These noises are sometimes caused by the simple touch of the hand on particularly sensitive microphones.

It supports 6 microphones (both unbalanced and with phantom power supply) but also 6 standard line signals through 6,3mm connectors.

The operation system is quite easy: the signal from the amplifier is filtered, processed and sent back to the amplifier/ the speakers. During the signal processing the undesired high and low frequencies will be automatically cut off.

Line In: 1RCA

MIC in: 6 XLR + 6 Jack 6,3

Line out: 1 RCA + 2 XLR

Line: 20Hz - 20KHz - Shift: 150Hz - 15KHz

S/N ratio >75dB

Rack space 1U

Output connectors XLR + RCA

Input connectors XLR + jack 6,3mm

Power supply 220V

Product dimensions 484 x 55 x 220 mm

Weight 3 kg

Color black
