MXW 5

Mixer 5 canali con doppio radiomicrofono

Compact and easily transportable audio mixer, it lends itself to use in the most varied situations. It accepts 1 mic/line input via XLR/6.3mm combo connector and 2 stereo line inputs via RCA. Unique in its kind, it has 2 radio microphones for practical use during parties, events, award ceremonies, baptisms, etc. It is powered by USB cable and therefore can be connected directly to a notebook or powerbank without using external power supplies (Type-C cable included).

The channel dedicated to the wireless microphones has tone and volume regulators, the one with combo connector also has a gain control while the 2 stereo channels can only be adjusted in volume.

The fifth channel is dedicated to the MP3 player that operates both via USB and connected to the PC as a sound card, picking up and sending the audio signal from/to a computer.

There is also +48V phantom power, a headphone jack, a bluetooth receiver and a 16-effect DSP processor.
