Small transmitter designed for guided tours. It can be applied to jackets or clothing by means of the back clip or worn as a necklace thanks to the included lanyard. It includes an internal microphone but if necessary it is possible to connect the external microphone (supplied) to bring it closer to the mouth and better pick up the voice. As an optional it is possible to purchase the headband microphone (DMC 10) which offers the best performance. Easy to use, it just features the power button and a button for pairing with receivers.

In ideal conditions it operates within a range of 100m. It can be recharged via Type C cable or by means of the optional TG 10CH multiple charging cradle (10 places) with magnetic system.

It is possible to use several transmitters with multiple receivers in the same room, in order to manage separate groups at the same time.

Kind of batteries	Li-ion 400mAh
Operating frequency	2.4 Ghz
Color	Black
Weight	0,03 kg
Product dimensions	40 x 55 x 20mm
Power supply	Built-in rechargeable battery
